

TROPICAL CYCLONE BULLETIN NO. 12

Tropical Depression "EMONG"

Issued at 5:00 AM, 6 July 2021

Valid for broadcast until the next bulletin at 11:00 AM today

TROPICAL DEPRESSION "EMONG" CONTINUES TO SLOW DOWN AND IS CURRENTLY OVER THE SEA OFF THE SOUTHERN TIP OF TAIWAN.	
Location of Center (4:00 AM)	<p style="text-align: center;">Track of Tropical Depression "EMONG"</p> <p style="text-align: center;">Philippine Atmospheric Geophysical and Astronomical Services Administration</p>
The center of Tropical Depression "EMONG" was estimated based on all available data at 165 km Northwest of Itbayat, Batanes (21.8°N, 120.7°E)	
Intensity	
Maximum sustained winds of 55 km/h near the center, gustiness of up to 70 km/h , and central pressure of 1002 hPa	
Present Movement	
Northwestward at 25 km/h	
Extent of Tropical Cyclone Winds	
Strong winds extend outwards up to 200 km from the center	

TRACK AND INTENSITY FORECAST

Date and Time	Center Position		Location	Intensity		Movement dir. and speed (km/h)

TROPICAL CYCLONE BULLETIN NO. 12

Tropical Depression “EMONG”

Issued at 5:00 AM, 6 July 2021

Valid for broadcast until the next bulletin at 11:00 AM today

TROPICAL CYCLONE WIND SIGNALS IN EFFECT			
TCWS No.	Luzon	Visayas	Mindanao
1 (30-60 km/h Strong winds prevailing or expected in 36 hours)	Batanes	-	-

HAZARDS AFFECTING LAND AREAS
Severe Winds Strong winds (strong breeze to near gale) will continue to prevail over Batanes. Winds will gradually weaken in the coming hours as the tropical depression moves away from Extreme Northern Luzon.
HAZARDS AFFECTING COASTAL WATERS
Under the influence of the tropical depression, rough seas (2.5 to 4.0 m) will be experienced over the seaboard of Batanes and Cagayan including Babuyan Islands. Sea travel is risky over these waters, especially for those using small seacrafts. Mariners without the proper experience should immediately seek safe harbor.
TRACK AND INTENSITY OUTLOOK
<ul style="list-style-type: none"> On the forecast track, “EMONG” may exit the Philippine Area of Responsibility this morning. The high movement speed of “EMONG”, the weak nature of its circulation, and the frictional effects of Taiwan’s rugged terrain prevents it from further intensifying. “EMONG” is forecast to maintain its strength until it makes landfall over coast of Fujian or Guangdong country in southeastern China this morning or afternoon.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 11:00 AM today.
